

## HSARPA BROAD AGENCY ANNOUNCEMENT | Innovative New Materials

### PROJECT INTRODUCTION:

The Homeland Security Advanced Research Projects Agency (HSARPA) Broad Agency Announcement (BAA) 05-01, "Innovative Materials for PPE" addresses a need that is becoming more serious as the nation's emergency responder community prepares to combat the results of future terrorist attacks. This program will be executed to develop highly innovative/revolutionary protective material and material systems that can be used by emergency responders and Homeland Security Operations professionals in multi-hazard environments. On behalf of HSARPA, the US Army Natick Soldier RD&E Center's National Protection Center (NPC) manages all contracting actions, programmatic responsibilities, and subject matter expertise associated with this BAA.

### OBJECTIVE:

- To develop and demonstrate novel new material technologies to support multiple DHS user missions.
- To provide management support, contracting, and subject matter expertise in support of the BAA.

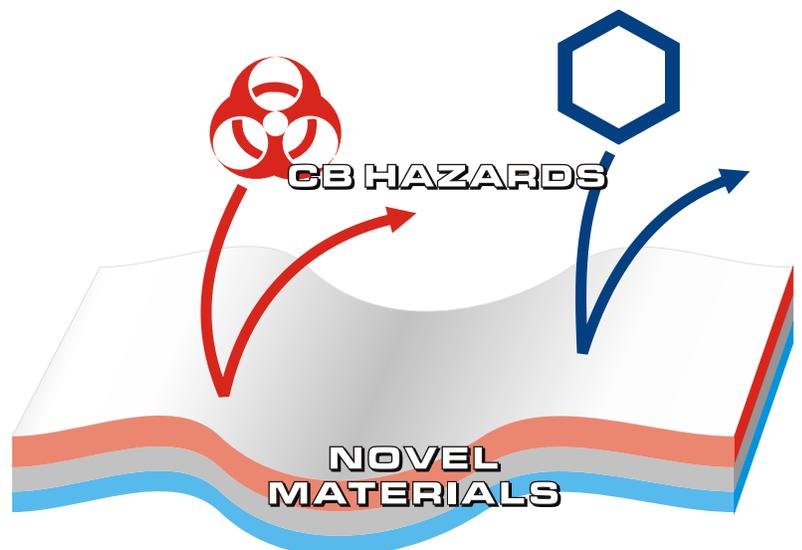

### PROJECT TEAM:

- Homeland Security Advanced Research Projects Agency (HSARPA)
- Natick Acquisition Center
