

TECHNOLOGY, SYSTEMS AND PROGRAM INTEGRATION DIRECTORATE (TSPID) | NSRDEC

The Technology, Systems and Program Integration Directorate serves as the primary NSRDEC technology integrator and assessor to advance and transition modular and reconfigurable Soldier systems and technologies that will benefit and serve the next generation Warfighter's operational capabilities. We ensure that the NSRDEC Science & Technology Program addresses the Soldiers' needs, and supports the Army's S&T vision, strategy, and Transformation Objectives. Additionally, we apply our expertise to manage the technology development, integration and experimentation of the USSOCOM Small Unmanned Aerial Vehicle (SUAV) ACTD; and we serve as a focal point for information exchange regarding protective clothing and individual equipment materials, systems and testing among homeland security emergency response professionals, military personnel and civilians in high-risk occupations.

WHY IS IT NEEDED:

The complexity in achieving the vision of the Soldier System as a formidable warrior in an invincible team, able to see first, understand first, act first, and finish decisively requires the dedicated and coordinated efforts of many organizations. Our focus is to bring together the best technologies and organizations to achieve that goal, and to serve as a conduit between the S&T and PEO communities.

THE TEAMS:

Ten highly motivated teams focused on the integration of Soldier systems, technologies, and programs across NSRDEC, RDECOM, DA, DoD, DOE, DOJ, DHS, industry and academia:

- Soldier Systems Integration Lab Team
- Soldier Integrated Protection Team
- Soldier Network, Power and Lethality Integration Team
- Soldier Mobility and Mission Enhancement Team
- Modeling and Analysis Team
- National Protection Center
- Unmanned Systems and Warfighter Teaming
- Business & Operations Team

KEY FEATURES / BENEFITS:

- Technology Planning and Road Mapping
- Technology Generation
- Technology Systems Integration
- Systems & Technology Assessments
